

# ALUMINA QUALITY WORKSHOP

## TECHNICAL PAPERS

	<i>Page</i>
Impact of Bauxite Source, Quality and Alumina Plant Design on Alumina Quality ( <i>A. R. Kjar, A. J. Crisp</i> )	1
The Effect of Precipitation Conditions of Alumina Quality ( <i>E. T. White</i> )	15
Organic Removal and Its Effect on Precipitation and Alumina Quality ( <i>J. Zoeldi, K. Solymaar, I. Feher</i> )	24
New Developments in Alumina Calcination ( <i>H. W. Schmidt, J. C. Taylor</i> )	38
<u>Experiences with Gas Suspension Calciner Alumina</u> <u>later:</u> ( <i>T. A. Venugopalan</i> )	53
Dry Scrubbing and Alumina Properties ( <i>E. Keul, G. Wedde, F. Bjorke</i> )	68
Alumina's and Cell Feeding Technologies ( <i>B. J. Welch, K. Grjotheim</i> )	75
Impurity Materials Balance in Alumina Reduction Cells ( <i>H. Kvande</i> )	87
Alumina, from the V.S. Perspective ( <i>D. F. Hewgill, G. C. Holywell</i> )	97
Factors affecting the Reagent Control of Crystallisation in Alumina Processing ( <i>M. E. Keeney</i> )	112
Bins, Segregation, Blending - Managing the Product Beyond the Calciners in Alcoa's Western Australian Operations ( <i>D. J. Lochore</i> )	122
Hydrate and Alumina - Unmasking Their Mysteries ( <i>G. I. D. Roach, J.B. Cornell, A. Antonovsky</i> )	137

**TECHNICAL PAPERS (Cont'd)**

	<b>Page</b>
The Contribution of Image Analysis to Alumina Quality ( <i>J. R. Siemon, P. Gottlieb, F. Stringer, J. S. Hall, G. Gougeon</i> )	149
Measuring Alumina Physical Properties, Current and Future Directions ( <i>A. J. Deacon, M. S. Wainwright</i> )	160
The Development of Australian Standard Procedures for Testing Alumina ( <i>I. Clements</i> )	179
Flowability of Smelting Grade Alumina ( <i>G. I. D. Roach, G. Reid</i> )	186
Particle Size Measurement and Interpretation ( <i>T. J. Davies</i> )	197
Iron Control by Improved Digestion Technology ( <i>K. Solymaar, J. Zoeldi, T. Ferenczi</i> )	210
New Polymers for the Bayer Process ( <i>D. P. Spitzer, A. S. Rothenberg, H. I. Heitner, M. E. Lewellyn</i> )	221
Optimisation of Alumina Precipitation Using Mathematical Simulation ( <i>P. J. Cresswell, T. Nguyen</i> )	231
Alumina Production for Modern Smelting Technologies by High Solid Content Precipitation ( <i>B. Cristol, J. Mordini</i> )	240
Recent Advances in Organics - Oxalate Control In, and Oxalate Disposal Arising from the Bayer Process ( <i>Kwat I. The</i> )	260
Soda in Alumina - Possible Mechanisms for Soda Incorporation ( <i>S. C. Grocott, S. P. Rosenberg</i> )	271
Crystal Growth Modification: Practical and Theoretical Considerations for the Bayer Process ( <i>W. J. Roe, D. O. Owen, J. A. Jankowski</i> )	288
